EU Mediation Law Handbook-Nadja Alexander 2017-03-15 Mediation is rapidly becoming a norm in cross-border dispute resolution among European Union (EU) Member States. Accordingly, an important question for legal advisers to ask themselves is: Which jurisdiction offers the best legal framework to support a potential future mediation of my client’s dispute? This book responds to this question by examining the law on mediation in each Member State on a chapter-by-chapter basis. Each country analysis applies the book’s overarching principle of a specially designed Regulatory Robustness Rating System, which is thoroughly explained in an introductory chapter. This framework offers a highly effective way to analyze the quality and robustness of each of the EU’s twenty-nine national jurisdictions’ legal frameworks relevant to mediation (including legislation, case law, practice directions, codes of conduct, standards, and other regulatory instruments) and factor such an analysis into choices about governing law in mediation clauses and other agreements. Among the issues and topics covered are the following: • congruence of domestic and international legal frameworks; • transparency and clarity of content of mediation laws; • standards and qualifications for mediators; • rights and obligations of participants in mediation; • access to mediation services; • access to internationally recognised and skilled mediators; • enforceability of clauses and mediated settlement agreements; • confidentiality and flexibility; • admissibility of evidence from mediation in subsequent proceedings; • impact of commencement of mediation on litigation limitation periods; • relationship and attitude of courts to mediation; and • regulatory incentives for legal advisers to engage in mediation. This detailed analysis clearly allows users and other regulatory stakeholders to look closely and critically at regulatory regimes for mediation in order to make informed choices and develop appropriate strategies in relation to the law that governs their mediation. This is the first book to consider authoritatively what makes good mediation law and what makes a jurisdiction attractive for cross-border mediation purposes in terms of its regulatory framework. As a resource that identifies potential strengths and weaknesses of each EU Member State’s regulatory regime, it has no peers and will be welcomed and put to use by the alternative dispute resolution community in Europe and beyond.

Civil Procedure in Italy-Mauro Cappelletti 2013-12-01

The Settlement of International Cultural Heritage Disputes-Alessandro Chechi 2014 The international practice of the past forty years shows the proliferation of a great variety of disputes concerning tangible cultural heritage. These mostly consist of inter-State and private claims about artworks stolen or illegally exported, and controversies regarding the protection of monuments and cultural spaces, not only from war-like situations, but also from non-violent processes, such as the realisation of investment projects. This book discusses whether an improvement in the manner in which these disputes are dealt with may enhance the international protection of cultural heritage.

International Co-Operation in Litigation: Europe-Hans Smit 2012-12-06 The reports collected in this book were prepared at the initiative and under the auspices of the Project on International Procedure of the School of Law of Columbia University within the framework of its co-operation with the Commission on International Rules of Judicial Procedure, a body created by Act of Congress of September 2, 1958, 72 Stat. 1743. The Commission is charged with studying domestic and foreign procedures of international co-operation in litigation with a view to suggesting improvements. Since June 1960, the Project has assisted the Commission in carrying out this statutory assigned task. Work on the reports here presented was begun in the fall of 1960. The Project invoked the assistance of an active practitioner in each of the foreign countries selected and submitted to him an extensive questionnaire summarizing American procedures and posing detailed quest ions about foreign practices. The elaborate answers to these questionnaires provided the information on which the American co authors relied in drafting the English versions of the reports. By having proceeded in this fashion, the Project hopes to have prepared reports that reflect the knowledge and experience of the foreign practitioners and at the same time are drafted in terms intelligible to common law lawyers. Furthermore, to ensure that the reports would take due account of official views, in almost all instances, final drafts of the reports were submitted for comments and suggestions to appropriate foreign public officials.

**State Succession in Cultural Property**-Andrzej Jakubowski 2015-06-04 The demise and rebirth of states brings with it a set of very complicated legal issues, among which is the question of how to deal with that state's cultural heritage, whether within its boundaries or not. Through a historical analysis of state dissolution and succession and its impact on cultural heritage from 1815 to present day, the work will identify guiding principles to facilitate the conclusion of agreements on the status of cultural property following the succession of states. Studying primary materials and evidence of state practice that has not been available before, the work will propose a novel approach to state succession from the perspective of the emerging interest of the international community to safeguard cultural heritage. State succession is one of the most obscure areas of international law since its rules are characterized either by their absence or their inconsistency. This book explores to what extent the principles and practice of state succession correspond to the evolution of the concept of cultural heritage in international law. It provides an extensive analysis of the alternations of the international practice and legal doctrine of state succession to tangible cultural heritage since the formation of the European nation-states in the nineteenth century - through the experience of decolonization to the post-Cold War dissolution of multinational states. The book has been awarded the Prize of the Professor Manfred Lachs Foundation and Kozinski University in Warsaw for the best monograph in public international law published by a Polish author in 2015, in the category of debuts. On 24 November 2016, the book State Succession in Cultural Property by Andrzej Jakubowski was awarded the Prize of the Professor Manfred Lachs Foundation and Kozinski University in Warsaw for the best monograph in public international law published by a Polish author in 2015, in the category of debuts.

**Criminal Liability of Political Decision-Makers**-Frank Zimmermann 2017-08-28 This book is dedicated to a fundamental conflict in modern states: those persons holding public office are no more than ordinary citizens. Therefore, their activities must - as a matter of principle - be subject to full judicial control. But at the same time, democratically legitimated politicians need some discretion in their decision-making. Allegations of politicians committing criminal offences in office quickly attract a great deal of media attention. Even politicians themselves frequently use such allegations to discredit their political opponents. However, to date this topic has not been fully addressed on an academic level. This book is a first step in this direction. The individual contributions cover topics such as: “bad” political decisions that result in a waste of taxpayers’ money corruption and conflicts of interest in political decision-making immunities and procedural obstacles to the effective prosecution of politicians abuse of criminal law and criminal proceedings in the political arena criminal liability for decisions taken in situations of state emergency the role of criminal law in public opinion. Leading experts examine these and other issues from a comparative perspective.

**The Public-private Law Divide**-Matthias Ruffert 2009 “This publication is a collection of papers of the second meeting of the Dornburg Research Group on New Administrative Law which was held in London in May 2007”--Acknowledgments.

**The Unaccountable State of Surveillance**-Clive Norris 2017-01-24 This book examines the ability of citizens across ten European countries to exercise their democratic rights to access their personal data. It presents a socio-legal research project, with the researchers acting as citizens, or data subjects, and using ethnographic data collection methods. The research presented here evidences a myriad of strategies and discourses employed by a range of public and private sector organisations as they obstruct and restrict citizens’ attempts to exercise their informational rights. The book also provides an up-to-date legal analysis of legal frameworks across Europe concerning access rights and makes several policy recommendations in the area of informational rights.

Improving Workplace Quality—William Bromwich 2017-05-01 A consensus has developed in workplace studies
around the concept of ‘well-being at work’ in an awareness that such apparently distinct aspects as health and
safety, discrimination, labour market integration, and work-life balance converge in the workplace and are best
treated as one complex phenomenon. This important book offers twelve contributions by distinguished
scholars and practitioners on a range of topics related to the integrity of contemporary societies. In response to the funds
generated by or for organised crime and transnational terrorism, strategies have been elaborated at national,
regional, and international levels for laws, organisations and procedures, and economic systems. Reflecting on
these strands, this handbook brings together leading experts from different jurisdictions across Europe, America,
Asia, and Africa and from different disciplines, including law, criminology, political science, international studies,

The US Supreme Court and the Modern Common Law Approach—Simona Grossi 2015-02-05 This book
studies the US Supreme Court and its current common law approach to judicial decision making from a national
and transnational perspective. The Supreme Court's approach appears detached from and inconsistent with the
underlying fundamental principles that ought to guide it, which often leads to unfair and inefficient results. This
book suggests the adoption of a judicial decision-making model that proceeds from principles and rules, using
them as premises for developing consistent unitary theories to meet current social conditions. This model requires
that judicial opinions be informed by a wide range of considerations, including established legal standards, the
insights derived from deductive and inductive reasoning, the lessons learned from history and custom, and an
examination of the social and economic consequences of the decision.

The Enforceability of Promises in European Contract Law-James Gordley 2001-07-12 Civil law and common law systems are held to enforce promises differently: civil law, in principle, will enforce any promise, while common law will enforce only those with "consideration". In that respect, modern civil law supposedly differs from the Roman law from which it descended, where a promise was enforced depending on the type of contract the parties had made. This 2001 volume is concerned with the extent to which these characterizations are true, and how these and other differences affect the enforceability of promises. Beginning with a concise history of these distinctions, the volume then considers how twelve European legal systems would deal with fifteen concrete situations. Finally, a comparative section considers why legal systems enforce certain promises and not others, and what promises should be enforced. This is the second completed project of The Common Core of European Private Law launched at the University of Trento.

Culture and the Judiciary-Ilenia Ruggiu 2018-12-07 How can jurists resolve multicultural conflicts? Which kind of questions should judges ask when culture enters the horizon of the law? Are they then called to become anthropologists? Through the analysis of hundreds of cases produced through decades of multicultural jurisprudence, this book reconstructs the constitutional and anthropological narratives and the legal techniques used by Western judges to face the challenges posed by multiculturalism: from Japanese parent-child suicide to the burqa, from Jewish circumcision to Roma begging, from kissing a son on his genitals to the claim of indigenous people to fish salmon in natural parks, the book brings the reader into a fascinating journey at the crux of the encounter between the relativism of anthropology and the endeavor toward a democratic coexistence pursued by the law. After identifying the recurrent themes or topoi used by judges and lawyers, this book critically analyzes them, evaluates their persuasive power and suggests a "cultural test" that gathers together the crucial questions to be answered when resolving a multicultural dispute. The "cultural test" is a matrix that guides the judge, lawyers and legislatures across the intricate paths of multiculturalism, to assure a relational dialogue between the law and anthropology.

Il commento, svolto in modo dettagliato, esamina il significato e la portata delle norme, i problemi essi fanno sorgere e le soluzioni, confortate dalla giurisprudenza e dalla dottrina. L’opera, che illustra il grande affresco dell’attività delle amministrazioni pubbliche, analizza tutti i principali problemi, dai “principi” di questa legge, al responsabile del procedimento, alle semplificazioni dell’azione amministrativa (tra le quali la Conferenza di servizi), agli accordi tra le amministrazioni, alla Denuncia di inizio attività (D.i.a.), ed alla Segnalazione certificata di inizio attività (S.c.i.a). Sono considerati anche i delicati problemi dell’efficacia e dell’invalidità, della revoca e del recesso, e le varie ipotesi dell’accesso ai documenti amministrativi.
