Business process re-engineering - Wikipedia

Business process re-engineering (BPR) is a business management strategy, originally pioneered in the early 1990s, focusing on the analysis and design of workflows and business processes within an organization. BPR aimed to help organizations fundamentally rethink how they do their work in order to improve customer service, cut operational costs, and become world-class competitors.

The Ultimate Guide to Business Process Reengineering
Jul 18, 2017 - BPR will cause your ERP implementation to take more time and money to implement. The undoing of many failed ERP implementations is to assume that "doing things right" will cost more time and money than cutting corners along the way. It may look good on paper to exempt the tedious aspects of business processes.
