Meat Goat Production - Penn State Extension

Jun 20, 2005 - Sheep and goat meat is the fourth most consumed meat, following pork, poultry, and beef. Meat goat production, like any other animal production enterprise, requires that good husbandry practices be followed in the areas of sanitation, health, feed, water, and shelter.

Sheep–goat hybrid - Wikipedia

A sheep-goat hybrid (called a geep in popular media or sometimes a shothog) is the offspring of a sheep and a goat. While sheep and goats seem similar and can be mated, they belong to different genera in the subfamily Caprinae of the family Bovidae. Sheep belong to the genus Ovis and have 54 chromosomes, while goats belong to the genus Capra and have 60 chromosomes.
